

CONTACT INFORMATION	Jacob O. Wenegrat Assistant Professor Department of Atmospheric and Oceanic Science University of Maryland, College Park, MD	wenegrat@umd.edu http://wenegrat.github.io
RESEARCH INTERESTS	Geophysical fluid dynamics, atmosphere and ocean dynamics, submesoscale processes, boundary-layer processes	
EDUCATION	Ph.D. , Oceanography School of Oceanography University of Washington, Seattle, WA.	2015
	M.S. , Applied Mathematics Department of Applied Mathematics University of Washington, Seattle, WA.	2014
	M.S. , Oceanography Department of Oceanography University of Washington, Seattle, WA.	2013
	B.S. , Symbolic Systems Stanford University, Stanford, CA.	2006
APPOINTMENTS	Assistant Professor , University of Maryland, College Park Department of Atmospheric and Oceanic Science Burgers Program for Fluid Dynamics (affiliate) Applied Mathematics & Statistics, and Scientific Computation (affiliate)	2020 - present
	Postdoctoral Fellow , Stanford University Department of Earth System Science • Supervisor: Leif Thomas	2016 - 2019
	Graduate Research Assistant , University of Washington School of Oceanography • Advisor: Michael J. McPhaden	2010 - 2015
REFEREED PUBLICATIONS <small>(GROUP MEMBERS IN BOLD)</small>	<p>[22] Chor, T., and J.O. Wenegrat, 2025: The turbulent dynamics of anticyclonic headland wakes. <i>J. Phys. Oceanogr.</i> in press.</p> <p>[21] Whitley, V., and J.O. Wenegrat, 2025: Breaking internal waves on sloping topography: connecting parcel displacements to overturn size, interior-boundary exchange, and mixing. <i>J. Phys. Benedek, Z., J.W.J. Liang, and **J.O. Wenegrat**, 2014: System for providing strategies to reduce the carbon output and operating costs of a workplace. U.S. Patent 8812971.

Tung, T.S., and **J.O. Wenegrat**, 2013: System for providing strategies for increasing efficiency of data centers. U.S. Patent 8395621.

EXTERNAL
FUNDING

Lagrangian evolution of bottom-boundary generated potential vorticity anomalies and their controls on submesoscale flows and mixing in the interior. Thomas, **Wenegrat**. ONR, \$562k to UMD, 2024-2029.

Collaborative Research: Interactions of internal waves with submesoscale currents in the bottom boundary layer. **Wenegrat**, Thomas. NSF, \$985k, \$418k to UMD, 2024-2027.

Submesoscale air-sea coupling during S-MODE. **Wenegrat**. NASA, \$53k, 2021-2024.

Atmosphere-Ocean coupling on (sub)mesoscales: US participant travel support. **Wenegrat**. NASA, \$25k, 2023.

Submesoscale instabilities and the forward energy cascade in seamount wakes. **Chor, Wenegrat**. NSF, \$314k, 2023-2025.

Collaborative Research: The Internal Wave Spectrum and Boundary Mixing in the Sub-Tropical South Atlantic. Polzin, Bracco, Kuehl, **Wenegrat**, Blain. NOPP/NSF, \$5.4 mil., \$340k to UMD, 2022-2025.

	CISESS: AOSC: A Global Census of Coastal Marine Heatwave Evolution and Drivers Using High-Resolution Satellite Data and Computer Vision. Wenegrat . NOAA, \$90k, 2022-2023.
	Collaborative Research: Tracing the physics of submesoscale entrainment and subduction. Wenegrat , Fox-Kemper, Brett. NSF, \$1.1 mil., \$568k to UMD, 2022-2025.
	Collaborative Research: EarthCube Capabilities: ICESpark: An Open-Source Big Data Platform for Science Discoveries in the New Arctic and Beyond. Xie, Yu, Farrell, Hurtt, Wenegrat . NSF, \$1.2 mil., \$956k to UMD, 2021-2024.
	Air-sea interaction and coupling at the ocean submesoscale. Wenegrat . NASA, \$361k, 2021-2024.
	Submesoscale instabilities in the ocean bottom boundary layer: A new pathway for energy dissipation. Wenegrat . NSF, \$383k, 2020-2023.
	Submesoscale instabilities near the sea-floor and their effects on the ocean circulation and mixing. Thomas, Wenegrat . NSF, \$325k, 2018-2020.
COMPUTATIONAL GRANTS	Realistic Nested LES of Ocean Mixing in the Gulf of Mexico, Wenegrat . UCAR CISL-CHAP, 13.75 mil core-hours, 2024-2026.
	High-performance computing for Tracing the Physics of Submesoscale Entrainment and Subduction. Wenegrat , Fox-Kemper, Brett. UCAR CISL-CHAP, 26.5 mil core-hours, 2022-2026.
INVITED TALKS	The Gulf Stream: Barrier, blender...or breadmaker? <i>DEEPS colloquium</i> , Brown University, Providence, RI, 2024.
	From fronts to turbulence: mechanisms and global impact of forward energy transfers at the submesoscale, <i>Ocean Transport and Eddy Energy Climate Process Team Annual Meeting</i> , Brown University, Providence, RI, 2024.
	Geostrophic turbulence, <i>Burgers Program Summer School on Turbulence</i> , College Park, MD, 2024.
	Submesoscale symmetric instability: a pathway to turbulence at the surface and in the abyss, <i>CICESE</i> , Ensenada, MX, virtual, 2024.
	Getting to the bottom of the submesoscale, <i>NOAA Coastal Ocean Modeling Seminar</i> , virtual, 2024.
	Effects of Air-Sea Interaction on Submesoscale Processes, <i>OASIS air-sea flux from space webinar series</i> , virtual, 2024.
	The Gulf Stream—Barrier, blender, or...Breadmaker?, <i>University of Delaware</i> , Lewes, DE, 2023.
	Submesoscale pathways to turbulence at the surface and in the abyss, <i>Rutgers University</i> , New Brunswick, NJ, 2023.
	Submesoscale symmetric instability: a pathway to turbulence in the Gulf Stream and abyss, <i>Old Dominion University</i> , Norfolk, VA, 2023.
	The Gulf Stream—Barrier, Blender, or...Breadmaker?, <i>Science on Tap</i> , College Park, MD, 2022.
	Submesoscale instabilities and mixing at the bottom. <i>Gordon Research Conference on Ocean Mixing</i> , Mount Holyoke, MA, 2022.

Submesoscale instabilities in the bottom boundary layer: A new frontier for ocean dynamics. *Scripps Institution of Oceanography*, La Jolla, CA, 2022.

The Gulf Stream—Barrier, Blender, or...Breadmaker? Enhanced Mixing at Sharp Ocean Fronts. *Johns Hopkins Center for Environmental & Applied Fluid Mechanics*, Baltimore, MD, 2022.

The Gulf Stream—Barrier, Blender, or...Breadmaker? Enhanced Mixing at Sharp Ocean Fronts. *Horn Point Laboratories*, Cambridge, MD, 2021.

The Gulf Stream—Barrier, Blender, or...Breadmaker? Enhanced Mixing at Sharp Ocean Fronts. *George Mason University AOES Department Seminar*, Fairfax, VA, 2021.

The Deep Ocean, Menagerie of Instabilities? *Burgers Symposium Lecture, University of Maryland*, College Park, MD, 2020.

From the surface to the abyss: Effects of the submesoscale on the large-scale circulation. *SOEST, University of Hawaii*, Honolulu, HI, 2019.

Submesoscale turbulence in the bottom boundary layer: A new frontier for oceanography. *AOSC, University of Maryland*, College Park, MD, 2019.

Air-sea interaction at the ocean submesoscale: Ekman transport and surface winds. *NASA Jet Propulsion Laboratory*, Pasadena, CA, 2019.

Into the deep: Submesoscale turbulence in the ocean bottom boundary layer. *Climate and Global Dynamics Seminar, NCAR*, Boulder, CO, 2018.

Submesoscale processes in the abyss: A new frontier for ocean dynamics. *Research School for Earth Sciences, Australian National University*, Canberra, AUS, 2018.

From the submesoscale to the gyre scale: How small-scale fronts modify the properties of ocean gyres. *Mechanical Engineering Department Seminar, University of California, Santa Barbara*, Santa Barbara, CA, 2018.

From the submesoscale to the gyre scale: How small-scale fronts modify ocean mode waters. *Oceanography Department Seminar, Dalhousie University*, Halifax NS, Canada, 2017.

Mixed layer dynamics and the diurnal cycle in the equatorial Atlantic Ocean. *Equatorial Dynamics of the Atmosphere and Oceans, AGU Fall Meeting*, San Francisco, CA, 2014.

Mixed layer dynamics and the diurnal cycle in the equatorial Atlantic Ocean. *Physics of Oceans and Atmospheres Seminar, Oregon State University*, Corvallis, OR, 2014.

SELECTED
PRESENTATIONS

Submesoscale processes in the high and low potential vorticity bottom boundary layer *AGU Fall Meeting*, Washington DC, 2024. Talk.

Submesoscales are a significant turbulence source in the global ocean surface boundary layer *Gordon Research Conference on Ocean Mixing*, Mount Holyoke, MA, 2024. Poster.

Submesoscale currents modify internal wave reflection off topography *Ocean Sciences Meeting*, New Orleans, LA, 2024. Talk.

Submesoscale currents modify internal wave reflection off topography *NOPP Internal Waves Workshop*, Gulfport, LA, 2024. Talk.

More than a length scale: air-sea interaction at the submesoscale, *US CLIVAR Mesoscale and Frontal Scale Air-Sea Interaction Workshop*, Boulder, CO, 2023. Talk.

Cross-scale interactions and prediction *US CLIVAR Process Study and Model Improvement annual panel meeting*, Norfolk, VA, 2022. Talk.

The current feedback on stress modifies the Ekman buoyancy flux at submesoscale fronts *Ocean Sciences Meeting*, virtual, 2022. Talk.

It's fronts all the way down: Response of the atmosphere to a submesoscale front. *CLIVAR Surface Currents Workshop*, San Diego, CA, 2020. Poster.

Forced symmetric and centrifugal instability in the bottom boundary layer *Ocean Sciences Meeting*, San Diego, CA, 2020. Poster.

Enhanced mixing across the gyre boundary at the Gulf Stream front. *Environmental Fluid Mechanics and Hydrology Seminar, Stanford University*, Stanford, CA, 2019. Talk.

Symmetric instability in the ocean bottom boundary layer: A new pathway for energy dissipation? *California Geophysical Fluid Dynamic Symposium*, Pasadena, CA, 2019. Talk.

Submesoscale turbulence in the ocean bottom boundary layer: Baroclinic, symmetric, and centrifugal instabilities. *22nd Conference on Atmospheric and Oceanic Fluid Dynamics*, Portland, ME, 2019. Talk.

Submesoscale instabilities in the bottom boundary layer. *Workshop on BBL turbulence and the Ocean Overturning Circulation, MIT*, Boston, MA, 2018. Talk.

Into the deep: Submesoscale turbulence in the bottom boundary layer. *SLS, MIT*, Boston, MA, 2018. Talk.

Into the deep: Submesoscale turbulence in the bottom boundary layer. *PO Seminar, WHOI*, Woods Hole, MA, 2018. Talk.

Submesoscale baroclinic instability in the bottom boundary layer. *Ocean Mixing Conference*, Gordon Research Conference, Andover, NH, 2018. Poster.

PV dynamics in the turbulent boundary layer. *Program on Planetary Boundary Layers*, Kavli Institute for Theoretical Physics, Santa Barbara, CA, 2018. Talk.

Submesoscale baroclinic instability in the bottom boundary layer. *Frontiers in Oceanic, Atmospheric, and Cryospheric Boundary Layers*, Kavli Institute for Theoretical Physics, Santa Barbara, CA, 2018. Poster.

Submesoscale baroclinic instability in the bottom boundary layer: A mechanism for enhanced vertical buoyancy fluxes. *Ocean Sciences Meeting*, Portland, OR, 2018. Talk.

From the submesoscale to the gyre scale: How small-scale fronts modify ocean mode waters. *Climate, Atmospheric Sciences, and Physical Oceanography Seminar, Scripps Institution of Oceanography*, San Diego, CA, 2018. Talk.

Submesoscale symmetric instability and observed rapid horizontal dispersion across the Gulf Stream. *CLIVAR Ocean Carbon Hotspots Workshop*, Monterey, CA, 2017. Poster.

Ekman transport in balanced currents with curvature. *21st Conference on Atmospheric and Oceanic Fluid Dynamics*, Portland, OR, 2017. Talk.

Effects of the submesoscale on the potential vorticity budget of ocean mode waters. *21st Conference on Atmospheric and Oceanic Fluid Dynamics*, Portland, OR, 2017. Poster.

Submesoscale dynamics in the turbulent boundary layer. *Oceanography Department Seminar, Dalhousie University*, Halifax NS, Canada, 2017. Talk.

Competing frictional and diabatic potential vorticity fluxes at ocean fronts. *AGU Fall Meeting*, San Francisco, CA, 2016. Talk.

Ocean boundary layer dynamics and air-sea interaction. *Physical Oceanography Dissertation Symposium (PODS) IX*, Honolulu, HI, 2016. Talk.

Dynamics of the diurnal cycle in the upper ocean: Theory, observations, and future challenges. *Environmental Fluid Mechanics and Hydrology Seminar, Stanford University*, Stanford, CA, 2016. Talk.

Implications of spatially varying boundary layer turbulence at a frontal system. *48th International Liège Colloquium on Ocean Dynamics*, Liège, Belgium, 2016. Talk.

The time-dependent vertical structure of mixed layer currents. *Ocean Sciences Meeting*, New Orleans, LA, 2016. Poster.

On the influence of winds, waves, and fronts on ocean currents. *School of Oceanography, University of Washington*, Seattle, WA, 2015. Talk.

Wind, waves, and fronts: An analytic solution to the generalized Ekman model. *20th Conference on Atmospheric and Oceanic Fluid Dynamics*, Minneapolis, MN, 2015. Talk.

Dynamics of the surface layer diurnal cycle in the equatorial Atlantic Ocean. *Physical Oceanography Seminar, University of Washington*, Seattle, WA, 2014. Talk.

A WKB approximation to the generalized Ekman equation, with application to the diurnal cycle. *Applied Mathematics MS Symposium, University of Washington*, Seattle, WA, 2014. Talk.

The diurnal cycle of near-surface stratified shear flow at 0°N, 23°W. *Ocean Sciences Meeting*, Honolulu, HI, 2014. Poster.

Near-surface shear flow on the Equator. *Physical Oceanography Seminar, University of Washington*, Seattle, WA, 2013. Talk.

Near-surface shear, stratification, and the mixed layer momentum budget at 0°N, 23°W. *Tropical Atlantic Variability Conference*, Kiel, Germany, 2012. Poster.

Near-surface eddy viscosity at 0°N, 23°W inferred from ADCP and wind stress data. *Ocean Sciences Meeting*, Salt Lake City, UT, 2012. Poster.

ADVISING

Postdoctoral researchers:

Tomás Chor <i>Postdoctoral Researcher, Atmospheric and Oceanic Science</i>	2020 - present
Zhihua Zheng <i>Postdoctoral Researcher, Atmospheric and Oceanic Science</i>	2023 - present

Graduate students:

Victoria Whitley <i>PhD Candidate, Applied Mathematics & Statistics, and Scientific Computing</i>	2020 - present
Igor Uchôa Farias <i>PhD Student, Atmospheric and Oceanic Science</i>	2021 - present
Zihan Chen <i>PhD Student, Atmospheric and Oceanic Science</i>	2023 - present

Logan Knudsen <i>PhD Student, Atmospheric and Oceanic Science</i>	2023 - present
Katharina Gallmeier <i>PhD Student, Atmospheric and Oceanic Science</i> Co-advised with Ivan Savelyev	2024 - present
Rachel Wegener <i>MS, Atmospheric and Oceanic Science</i>	2021 - 2023
Benjamin Johnson PhD <i>PhD, Atmospheric and Oceanic Science</i> Co-advised with Eugenia Kalnay	2020

Undergraduate students:

Megan Brown <i>Undergraduate research project, Atmospheric and Oceanic Science</i>	2023 - 2024
Madison Magaha <i>Undergraduate summer researcher, Atmospheric and Oceanic Science</i>	2023
Jennifer Salerno <i>Undergraduate research project, Atmospheric and Oceanic Science</i>	2023
Skylar Lama <i>Undergraduate capstone project, Atmospheric and Oceanic Science</i> <i>Bernice and Susan Tannenbaum Prize in Climate Science,</i> <i>for outstanding research achievements</i>	2021 - 2022
George Campe <i>Undergraduate capstone project, Atmospheric and Oceanic Science</i>	2021-2022
Daniel Levy <i>Undergraduate Researcher, Mathematics & Physics</i> <i>UMD Goldwater Scholarship nominee</i>	2021
Emma Bonnano <i>Undergraduate capstone project, Atmospheric and Oceanic Science</i> <i>Bernice and Susan Tannenbaum Prize in Climate Science,</i> <i>for outstanding research achievements</i>	2020-2021

PHD COMMITTEES	Mahdi Khademishamami PhD	2024
	Tim Boyer PhD	2024
	Vedant Kumar PhD	2023
	Nikhil Oberei PhD	2023
	Craig Schwartz PhD	2021
	Austin Hope PhD	2020
	Benjamin Johnson PhD <i>Committee Co-Chair with Eugenia Kalnay</i>	2020

TEACHING

University of Maryland, College Park, MD

Instructor, *Oceanography of the Chesapeake and Mid-Atlantic*

Spring 2022-2024

Instructor, *Physical Oceanography*

Fall 2020-2024

Stanford University, Stanford, CA

Project Mentor, *SURGE Undergraduate Summer Research*

Summer 2018

University of Washington, Seattle, WA

Instructor, *Physics across Oceanography*

Winter 2015

Course Development, *Huckabay Teaching Fellow*

Autumn 2014

SERVICE AND LEADERSHIP

Science

- Co-Chair US CLIVAR Working Group on Small-scale processes in the upper ocean and their interaction with the Earth's climate (2024 - present)
- Steering Committee, ONR Researching Interior Ocean Trajectories (RIOT) DRI (2024 - present)
- Science Team, NASA Sub-Mesoscale Ocean Dynamics Experiment (S-MODE, 2020 - present)
- Co-Chair US CLIVAR Process Study and Model Improvement Panel (2024 - present)
- Panelist US CLIVAR Process Study and Model Improvement Panel (2021 - 2024)

Conferences and Workshops

- Co-Chair: *Summer School on Tracer mixing in fluids across planetary scales* Brin Mathematics Research Center, UMD 2024
- Co-Chair: *Atmosphere-ocean coupling at (sub)mesoscales*, Lorentz Center, Netherlands, 2023
- Co-Chair: *Turbulent Mixing of the Ocean Surface Boundary Layer: Observation, Simulation, and Parameterization*, Ocean Sciences Meeting 2022
- Moderator: *Turbulent Mixing of the Ocean Surface Boundary Layer: Observation, Simulation, and Parameterization*, Ocean Sciences Meeting 2020
- Chair: *Air-Sea Interaction at the Mesoscale and Submesoscale*, Ocean Sciences Meeting 2018

Reviewing

- Editor, *Journal of Physical Oceanography* (2023 - present)
- Associate Editor, *Journal of Physical Oceanography* (2020-2022)
- 2020 AMS Editor's award, *Journal of Physical Oceanography*
- *Journal of Physical Oceanography*, *Journal of Fluid Mechanics*, *Geophysical Research Letters*, *Journal of Geophysical Research*, *Nature*, *Quarterly Journal of the Royal Meteorological Society*, *BAMS*, *Ocean Dynamics*, *Ocean Sciences*, *TOS*, *Scientific Reports*, *Journal of Atmospheric and Oceanic Technology*, *JAMES*, *Continental Shelf Research*, *Journal of Climate*
- *NASA Physical Oceanography* proposal review panels, *NSF Physical Oceanography* panelist and ad hoc proposal reviewer, *NERC* proposal reviewer, *US-Israel Binational Science Foundation* reviewer
- Pre-publication chapters of: *Atmospheric and Oceanic Fluid Dynamics II*, G.H. Vallis.
- *NOAA Ernest F. Hollings Undergraduate Scholarship* program.

University

- Graduate Admissions Chair (2024 - present)

- Graduate Admissions Co-Chair (2020 - 2024)
- Lead for AOSC-AGU Bridge Program Partnership (2020 - present)
- Faculty search committee AOSC (2024)
- Seminar Committee Chair (2020 - 2022)
- DMV Oceans Lunch Seminars organizer (2020 - 2022)
